Dear Friend Truzzi,

Thanks for your reminder about the ZS Dialogue.
You were very kind to think of me again.

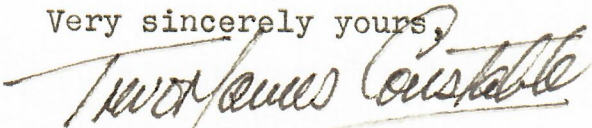

My original work on UFO's, circa 1957-58, has been comprehensively confirmed now by independent groups of engineers and technicians working in Italy and Rumania. These two groups of competent and capable people did original work along the same lines as myself, but without any knowledge of my prior activities. They now have many dozens of photographs of invisible bioforms, which corroborate mine fully. Q.E.D.

Nevertheless, I have retired from the field of UFO's in order to do productive research in weather engineering. Aside from assembling a mutually corroborative collection of photographs from Italy, Rumania and NASA, I consider my work finished in the UFO field.

I wish you well with your dialogue, but have no further interest in the discussion of UFOs.

With kind regards,

Very sincerely yours,

Trevor James Constable
